FLOOR TILES

TOP TILE

**STEP
ON
TO
YOUR
IMAGINATION**

Bergo launches TOP TILE

– a brand new concept of floor tiles for public areas.
Make your own design from a photo or choose from our fancy collection.

Imagine a floor that is made just for YOU.

A floor that can be laid almost anywhere.

A floor that can be installed where other types of flooring fail - on cold, damp and uneven surfaces.

A floor that doesn't require heavy preparation. No more glues, screws or nails.

TOP TILE makes it possible to create a truly unique expression, e.g. in shops where you can "top" the interior with a floor in your own color and design, made from your photo.

TOP TILE has undergone several tough tests to withstand heavy wear in public environments, such as offices, shops, exhibitions, receptions, showrooms etc.

Bergo has been making multifunctional floors from ECO-friendly PP-composites for more than 40 years. The floors are made of non-toxic, emission-free and food grade materials that are 100% recyclable again and again.

Step on to your imagination. We have started with these examples:

TOP TILE Scratch SC1062

TOP TILE Cube CU1062

TOP TILE Black Prism PR1062

TOP TILE Antique Chestnut AC1062

TOP TILE Wood Nature WO1062

Material: Environmentally friendly recyclable UV-stabilized PP-composite.

378 x 378 mm.
10,7 mm.

Patent pending

Proudly made in Sweden

Easy to install

Tapping a rubber mallet or similar over the protruding rings easily interlocks the tiles together. No special tools, glue or screws are required. If necessary, use a jig- or a circular-saw to cut the tiles for a perfect fit. For increased comfort a suitable sound absorbing foam underlay may well be used underneath the TOP TILE.

Usage areas

Bergo Flooring has developed a wide range of flooring products for different environments. TOP TILE is specially developed for public areas such as: Offices, shops, hotels, restaurants, exhibitions, show rooms etc.

Our business areas

Our flooring concept

Bergo Floor Tiles are made from recyclable PP-composite. Our floors are installed floating on existing floors without any fasteners. A Bergo Floor solves many problems thanks to the ventilating and flexible design and is particularly suitable for installations on damp surfaces, but also on cracked / uneven subfloors and worn wooden decks. Our products are available in a wide range of designs and colours, harmoniously coordinated.
