PADEL

PADEL

Padel - The world fastest growing sport; mildly digressed from Tennis it is suitable for all ages and encourages highly social relationships. Padel is also called Padel Tennis or Paddle Tennis.

Known as being born in Mexico, spread to Spain and Argentina. Nowadays Padel started to get popular in a lot of countries including Germany, Italy, Portugal, Scandinavian countries, Qatar, United Arab Emirates, and many more.

Formerly known as Padel Tennis, it maintains the same rules and scoring as tennis, in a simplified way. The only differences are smaller court sizes, hard racquets, and a softer ball.

As Ilkesport we provide three types of Padel grass in order to meet different kinds of needs, developed accordingly to international standards and players' benefits, we are constantly evolving our product to the latest player needs.

PADEL ECO

Our Eco grass, with its fibrillated fibers supports the ball's bouncing movements, which is highly important in this sport. The ball needs to move naturally, that's why Padel Eco artificial grass was designed and produced by considering these properties. It is a traditional and affordable product that is more suitable for amateur courts. The sand works significantly better on fibrillated turf and also assists fast games.

TENNIS

TENNIS

We design our artificial tennis court grass systems according to the international standards. Important is, prior turf decision, to know the slow, medium, or fast playing characteristics.

Do you want to know more about our artificial tennis court turfs? Traditional surfaces such as grass, gravel and tarmac therefore sometimes have to make room for alternatives such as artificial grass.

Compared to natural grass, artificial turf pitches for tennis can be a more advantageous choice. It requires less maintenance, is user-friendly, wear-resistant, preserves its color for a long time, and is not affected by weather conditions.

Ilkesport tennis courts can be played on at any time; Its structure guarantees a firm, consistent ball bounce, which offers the players an optimal playing comfort and reduces the risk of muscle and joint injuries.
